CLEANING TOOLS

2025

UPDATED: 2025.09.16.

The data found in the catalog are not for reference and subject to change.

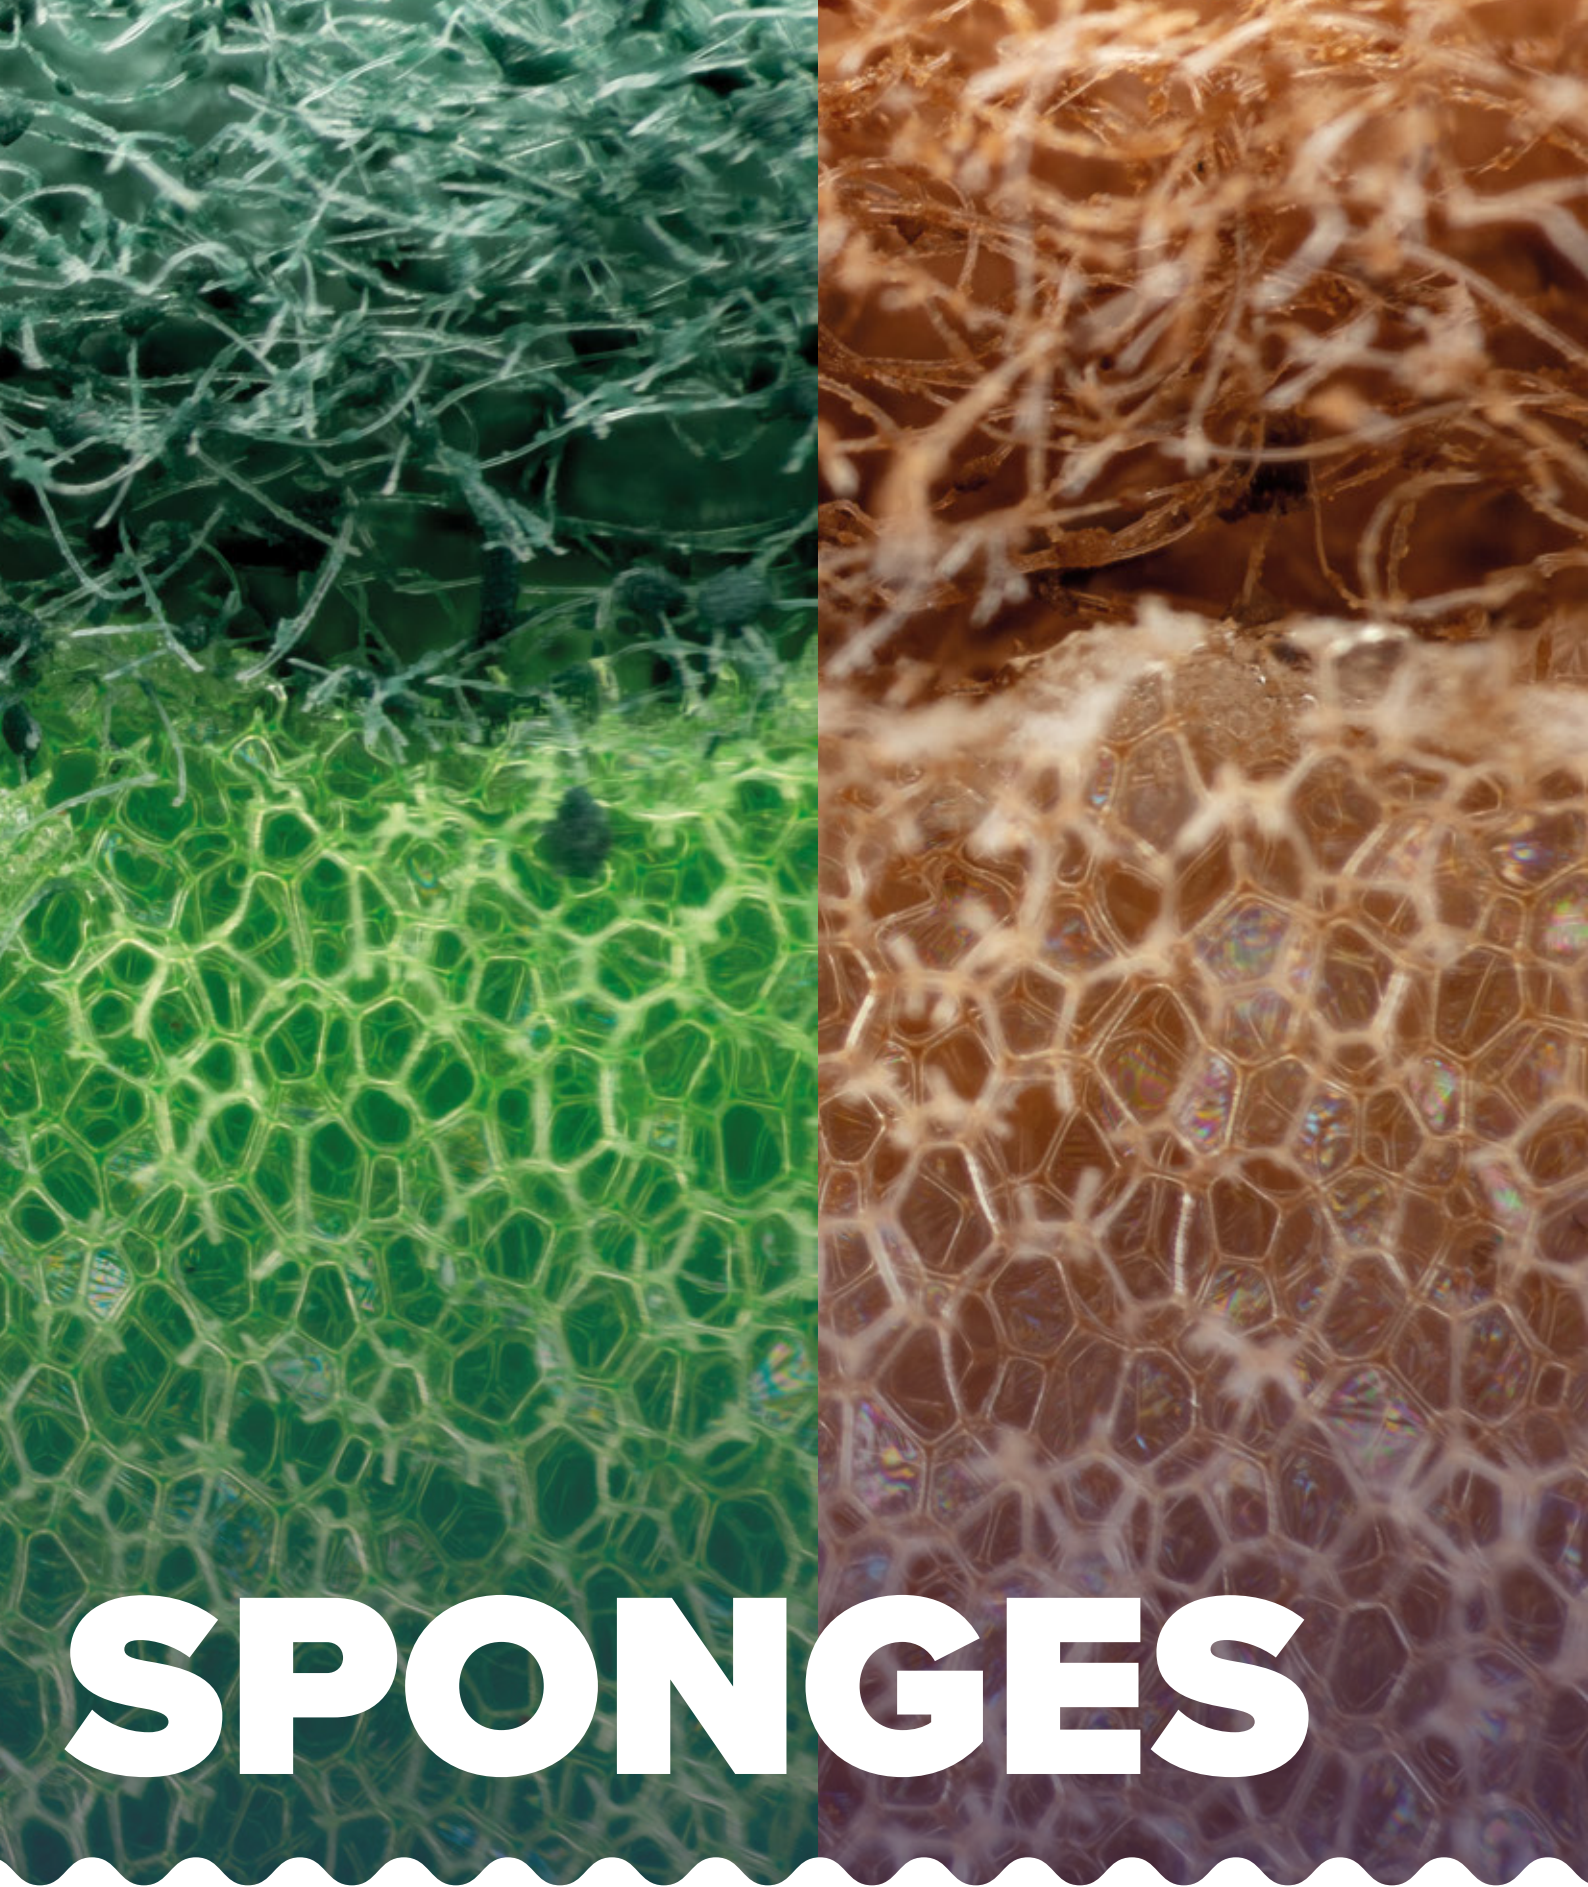

We produce Hungary's *best** cleaning tools

***our own opinion**

BONUS, Hungary's largest manufacturer of cleaning tools, will appear on store shelves with a renewed brand identity starting in 2025. While the changes may seem subtle at first glance, they are significant to us: we've highlighted elements that help customers make more informed product choices. We've simplified our visual communication, giving our products a clearer and more understandable appearance.

In addition to the visual refresh, we are continuously working on developments aimed at expanding our product range. The years 2023–2024 were especially important for us, as we launched our broom and brush production facility. Unlike other players in the domestic market, we are almost entirely capable of manufacturing our products in-house, which contributes to the security of our partners' supply chains. Just as in previous years, our product development and renewal efforts continue this year as well.

SPONGES

What's on the picture?

The image shows the foam and scouring surface of the ECO sponge photographed in macro mode. The polymers form a network that helps generate foam from the dishwashing liquid.

WWW.BONUS.CLEANING

B314 Sealing clips 10/1

Durable, hinged bag sealing clip, which due to its special rib design can seal even the thinnest bags airtight.

LOGISTICS DATA	QUANTITY PER UNIT	WEIGHT (g)	DIMENSIONS (X×Y×Z cm)
1 PACKAGE OR SET	10 PIECE(S)	105	19×16×8
ORDER UNIT	20 PACKAGE	2.800	40×20×21

We produce hungary's *best** cleaning tools

*** our own opinion**

BONUS, Hungary's largest manufacturer of cleaning tools, will appear on store shelves with a renewed brand identity starting in 2025. While the changes may seem subtle at first glance, they are significant to us: we've highlighted elements that help customers make more informed product choices. We've simplified our visual communication, giving our products a clearer and more understandable appearance.

In addition to the visual refresh, we are continuously working on developments aimed at expanding our product range. The years 2023–2024 were especially important for us, as we launched our broom and brush production facility. Unlike other players in the domestic market, we are almost entirely capable of manufacturing our products in-house, which contributes to the security of our partners' supply chains. Just as in previous years, our product development and renewal efforts continue this year as well.

B492, B508, B515 MADDOX 40, 60, 80 CM
